St. George Russian Orthodox Church to be Built in Loveland, Ohio

The St. George Russian Orthodox Church began in Cincinnati, Ohio in the 1940's and was closed in the early 1980's. It was reborn in 1988, when a group of Orthodox Christians petitioned Archbishop Alyphy of Chicago, to start a parish in Loveland. Most members are recent immigrants from Russia, Ukraine and Georgia. [Read more about this parish](#)

Bruns General Contracting will build 2 levels approximately 4,500 square feet each. The lower level, partially recessed will serve as a fellowship hall with adjoining administrative areas. The sanctuary is on the upper level, is a 2 story height, and is overlooked by the choir balcony. A 9 ft. dome, approximately 20 ft

in diameter, with clerestory windows, sits atop a compression ring and supports a 19 ft tall, round cupola, which creates a naturally lit interior space approximately 44 ft tall at the center of the building.

Steeple Removal at St Paul's United Methodist Church

Bruns General Contracting, has been awarded the 1st Phase of the Steeple Removal Project at St. Paul's United Methodist Church in Eaton, Ohio. The church and steeple originally dedicated in 1871, has become unstable and in need of repair. The church has opted to remove the existing structure. The steeple is approximately 40 ft tall, and sits on top of a 24 ft high bell tower, with an overall height of 140 ft. above the ground. **[Correction to the bell tower height and overall height.]**

Phase I calls for the current bell tower and steeple to be removed from the roof. A new roof infill that compliments the existing roof line will be installed in the remaining opening.

Do you have a project at your church that you need help with? There is no project too large or too small for Bruns General Contracting.
